## TEAM PROJECTS

### Readers' Choice Awards

Lead developer for multipronged user feedback campaign at xxxx Company. Built XSL templates that gathered user responses for topics, such as best mobile phones, to enhance organic search results. Divided project into smaller parts and assigned to team members based on skills/strengths. Mentored junior developers. Ensured team members' work met project specifications, requirements, and deadlines.

### Streamlined Header Updates

Lead Developer. Collaborated with xxxx Company team members to devise new method for faster site-wide header updates. Analyzed configuration of current header files, identified appropriate SSI files and environmental variables, modified site-wide XSL templates with new logic. Extensive beta testing. Reduced amount time needed to modify headers from two days to a few hours.

## PROFESSIONAL EXPERIENCE

<b>xxxx Company</b> , New York, NY <b>Front-End Web Developer</b>	<b>06/2007 – 03/2013</b>
--	--------------------------

- Front-end development with HTML5, CSS3, JavaScript, XML, XSL, PHP, and Apache SSI on a UNIX-based backend environment utilizing a proprietary CMS.
- Built and maintained xxxx site templates. Introduced PHP into templates to reduce unnecessary SSI include files.
- Developed reusable, backwards-compatible polyfills for responsive design and tablet/mobile optimization. Integrated Modernizr to build JavaScript shims to enhance mobile user experience.
- CNET Winner, "\_\_\_ Award", 2009.
